

Kern Mail Green: Eco-Friendly Remanufactured Metering Cartridges for Your Mail Production

Companies continuously go through postage meter and addressing ink cartridges, without any Return on Investment (ROI). With Mail Green from Kern, instead of throwing away your empties, customers have the opportunity to go green and save significantly through Mail Green's eco-friendly remanufactured postage meter and addressing ink cartridges.

The Process:

Mail Green recycled cartridges guarantee the same performance as the manufacturers' ink cartridges at only a fraction of the cost. It begins with the original cartridge, to which a high performance ink formula is added, the chip is reset to its original "ink full" state, the rubber seals are replaced, and then tested before being shipped to you. The high efficiency ink formulas have even been tested for fluorescence and compatibility with USPS facing and sorting equipment.

Get Paid to Recycle with Mail Green:

You can start receiving significant discounts on your metering cartridges and get up to \$5.00 for every recycled cartridge by contacting your account manager or emailing ordermailgreen@kerninc.com. Even if you do not purchase Mail Green's metering cartridges, you can still take advantage of the recycling program by emailing recyclemailgreen@kerninc.com. We will send you a postage-paid label for your empty cartridges, and once they are received, we will send you up to \$5.00 for every cartridge.

Collecting empty cartridges means savings for both you and the environment. Don't miss out on the opportunity to get paid to recycle.

Kern Innovative Solutions

Outside of our core products, Kern has developed innovative solutions to make production mail more productive.

Advantages of Mail Green

- Same performance level as manufacturers' ink cartridges, but at a fraction of the cost
- USPS compatible
- Significant savings for both you and the environment
- Save up to \$5.00 per recycled cartridge
