

Kern 110 Roll Rewinding Module

The K110 Roll Rewinding Module offers everything you could possibly want in a production rewinder.

Perfect Paper: All Wound Up

The precise torque control ensures optimal rewinding quality. The integrated paper buffer is equipped with a five-roller dancer system and paper tension is automatically reduced by a timer-controlled dancer lift. The automated lift makes loading and unloading rolls of paper easy. The entire module is electronically synchronized and capable of communicating with a variety of printing systems.

Ease of Operation

The color touch screen simplifies operation. Operating the K110 Roll Rewinder is always smooth and efficient; thanks to the module's outstanding ergonomic design and the user-friendly handling. Because of Kern's modular philosophy, expanding needs can be cost-effectively met so that unwinding and rewinding can be done with the same module. With a few modifications, the K110 can be converted into a K115 Rewinder that will feed paper to or from the roll reliably.

Kern DFD

Document Finishing on Demand. The DFD provides intelligent solutions for pre-and-post-processing of digitally printed materials. All DFD modules can be combined to form complete systems, or they can be used in ways that directly address the needs of customers.

Product Specifications

Roll Diameter (max): 54" / 1372 mm

Roll Width: 6" - 20.5" / 150 - 520 mm

Paper Weight: 14 Lb - 48 Lb

Certification: CE
