K146 High Stack Folder

Kern 146 High Stack Folder High Stack Fanfolding for Pinless and Pinfeed Continuous Form Applications

Folding Continuous Forms into Large Stacks

The Kern 146 High Stack Fanfolding module folds continuous forms into large stacks. This module offers everything that you could desire from a stacker: It creates fanfold stacks of one up or two up continuous forms with or without pinfeed. It can automatically separate jobs with an odd or even number of sheets; the intermediate conveyor belt allows you to create separate stacks without interrupting printing. Set up is extremely simple and easy for the Kern 146 High Stack Fanfolding Module as the paper threads itself automatically. With the color display, operators can quickly select fold specifications, and the appropriate adjustments can be made automatically. The K146 also creates stacks perfect for all of Kern's inserting solutions.

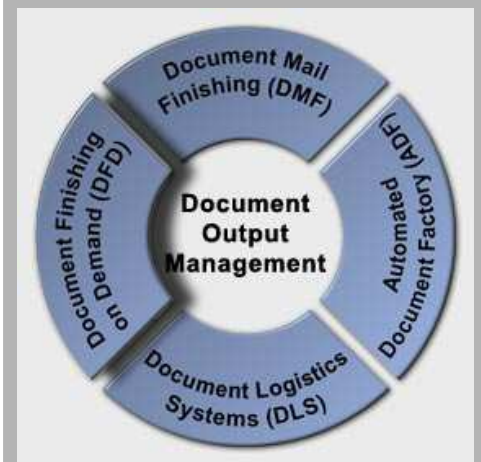

You can choose between two delivery systems: The folded forms can be transferred directly to a drop stacker, where they are set upright and then moved by a stack trolley. Alternately, the forms can be set upright with the help of a tilting table, after which the whole stack can be turned over, making it possible to process documents from A to Z or Z to A.

Roll to High Stack Folder Configuration

The Kern roll to high stack folder configuration consists of Kern 100 Unwinder feeding the web to the printer. Then the Kern 146 High Stack folder will fold the web at the output side of the continuous forms printer. Allowing for continuous print, the K146 folds high volumes of paper with cross perforation while bypassing the printer built-in stacker.

Kern DFD

Document Finishing on Demand. The DFD provides intelligent solutions for pre-and-post-processing of digitally printed materials. All DFD modules can be combined to form complete systems, or they can be used in ways that directly address the needs of customers.

Product Specifications

Folding Speed: 500 ft/min
(10-150 m/min)

Form Length: 8-16" adjustable in increments of 1/6", 1/8" or .1mm

Paper Width: 8.25-20.5" (210-520mm)

Paper Weight: 18-32 lbs (70-120g/m²)

Stack Height: 100 sheets to 31.5" (with Kern Stacker) or 100 sheets to 48" (with Forms Transfer System)
