

Kern 971 Single Sheet Feeder

The Extremely High Feeding Speed

52,800 sheets per hour allows mailers to take full advantage of Kern's high speed Document Inserting Systems. Kern designed the K971 Single Sheet Feeder to maximize the production capabilities of the K3000 and K3500 high speed inserting systems when processing cut-sheet applications. The K971 allows production mailers to keep up with optimum processing speeds, exceeding mailing demands.

User Comfort

Operators appreciate the ergonomically ideal working height and the input stack conveyor's capacity of 8,000 sheets. This allows mailers to focus on other aspects of production instead of the constant need for operator intervention. The K971 can be added to a wide range of Kern Document Mail Finishing products. The K3000 and K3500 can all be configured with the K971 for incomparable output. When the K971 Single Sheet Feeder is added to the K3500 Dual Channel High Speed Inserting System, an incredible production speed of 22,000 mail pieces per hour can be realized. The K971 can be added to either input channel, allowing mailers to add inserts as well as personalized pages, leaving only your imagination as the limitation for the capabilities of adding the K971 to any of your inserting systems.

Double-Deck Grouping Station

Fast accumulation ensures that high speeds are maintained when collating multiple-page documents. This allows mailers to run multiple page applications and take advantage of the maximum speed of your Kern inserting system.

The Reading Unit

Featuring an advanced reading unit, the K971 enables you to process personalized documents according to Kern's proven, world-leading standards. This unique function allows mailers to run file base documents, read barcodes, improve document security and matching, optimize any MailFactory software, as well as fulfill a variety of other production demands.

The success of our customers is the most important part of our business. At Kern, we believe that we don't succeed unless our customers succeed. Fast machines, advanced technology, and outstanding technical support are the fundamental strengths of what we do. By establishing a mutually beneficial partnership, both our customers and Kern are able to achieve success and we back it up with a guarantee.

Your Kern product is **guaranteed** to provide a minimum of Ten Years of production grade output, when maintained under a Kern Full Service Maintenance Agreement. If we can't fix it, we'll replace it. Period."
